PROFESSIONAL SUMMARY

Results-driven Frontend Developer with hands-on experience designing and deploying responsive, production-grade web applications using React.js, JavaScript (ES6+), HTML5, CSS3, and Tailwind CSS. Demonstrated ability to build polished, user-centric interfaces—including a live restaurant ordering platform with dynamic UI, backend API integration, and email-based order management. Proficient in AI-assisted development workflows, cloud deployment (Netlify), and version control (Git/GitHub). Seeking a Frontend Developer role at a product-driven company in Bangalore to craft fast, accessible, and visually compelling digital experiences.

TECHNICAL SKILLS

Core Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design, DOM Manipulation

React Ecosystem: React Components, Props & State, React Hooks, Single Page Applications (SPA)

UI & Styling: Tailwind CSS, Flexbox, CSS Grid, Mobile-First Design, Cross-Browser Compatibility

Backend (Supporting): Node.js, Express.js, REST API Integration, Nodemailer/SMTP

Tools & Platforms: Git, GitHub, VS Code, Netlify, Vercel

AI-Assisted Dev: GitHub Copilot, ChatGPT, Antigravity Agent

WORK EXPERIENCE

Frontend Developer Intern

September 2025 – October 2025

AspiraSys | Chennai, Tamil Nadu

- Designed and developed responsive single-page web applications using React.js, HTML5, CSS3, and JavaScript (ES6+), applying component-based architecture for scalability.
- Built and deployed a full-stack restaurant ordering platform featuring backend APIs (Express.js), email-based order management, and real-time menu interaction.
- Created reusable UI components in React.js, reducing redundant code and improving maintainability across the project codebase.
- Integrated AI development tools including GitHub Copilot and ChatGPT to accelerate development cycles and enhance code quality.
- Deployed web applications to cloud platforms (Netlify) ensuring cross-browser compatibility and mobile responsiveness.
- Managed full project lifecycle using Git and GitHub—including branching, commits, and version control best practices.

PROJECTS

Restaurant Ordering Platform (Full Stack)

2025

Tech Stack: JavaScript, Express.js, Node.js, HTML5, CSS3, Nodemailer | Deployed: Netlify | GitHub: github.com/shahidsss8998-debug

- Engineered a complete full-stack restaurant ordering web app featuring a dynamic menu, cart management, and real-time order placement.
- Developed RESTful backend APIs using Express.js to handle order submissions, menu data retrieval, and server-side logic.
- Implemented automated email-based order management system using SMTP integration, notifying restaurant staff upon each order submission.

- Deployed the application on Netlify with optimized load times and responsive design across mobile and desktop viewports.

Personal Portfolio Website

2025

Tech Stack: HTML5, CSS3, JavaScript, Tailwind CSS | Live: shahidtech.in | GitHub: github.com/shahidsss8998-debug

- Designed and developed a fully responsive personal portfolio website from scratch to showcase projects, skills, and professional profile.
- Implemented smooth UI interactions, optimized page performance, and ensured cross-device compatibility.
- Deployed and maintained the live site at shahidtech.in using Netlify continuous deployment.

EDUCATION

Bachelor of Computer Applications (BCA)

2024 – Present

MHIS College | Pernambut, Tamil Nadu

- Pursuing core computer science subjects including programming, web development, database management, and software engineering fundamentals.

Higher Secondary Certificate – Computer Science

2021 – 2023

Parudur Higher Secondary School, Tamil Nadu

- Completed HSC with specialization in Computer Science; built foundational knowledge in algorithms, programming logic, and computing principles.

CERTIFICATIONS & TRAINING

Web Development, AI Tools & Deployment Platforms

September – October 2025

AspiraSys, Chennai | 1-Month Professional Internship Certificate

- Completed intensive training in modern web development stack, AI-powered developer tools (GitHub Copilot, ChatGPT), and cloud deployment platforms.
- Delivered real-world project (portfolio website + restaurant ordering platform) as certification deliverable.
